SUMMARY

I have a passion for messy problems. I've worked on projects that range from a cloud platform, to a blockchain application tracking a bank's supply chain, to an AI-enhanced search experience for economists. Projects like these can be a harsh environment for design, but that challenge motivates me to get my hands dirty and do my best work. My biggest strength is taking that intangible, 55-pound hairball of a problem and breaking it down into actionable pieces through exploration and user validation. I'd love to talk about the messy problems we could solve together!

WORK EXPERIENCE

IBM CLOUD GARAGE - PRODUCT DESIGNER & CONSULTANT

New York, New York

Building new products for IBM Clients using Design Thinking, Lean approach, and IBM technology.
